Accent Technologies is a specialized software and consulting firm headquartered in Melbourne, FL. We help our clients streamline key sales and marketing processes through automation technology and consulting. Our solution and services are used by many top Fortune 500 companies including several of the world's top financial, healthcare and sales and marketing firms. We offer competitive salary commensurate with experience, 401(k) and a desirable benefits plan.

Our team is seeking a highly motivated, conscientious, and exceptional C++ Programmer who loves to work in a dynamic, fast-paced environment using the latest technologies for software development. Primary responsibilities involve design, development, and maintenance of code for Accent Technologies' award winning commercial software products. The selected candidate will work with other experienced software engineers to ensure the quality of the software products by designing and writing code according to specifications highlighted in the design and planning phase, writing and running appropriate diagnostic tests, and proactively solving bugs as problems arise. The selected candidate will also have the opportunity to interact and assist customers and other employees with solution and technical related issues.

Tasks Include:

Primary responsibilities involve design, development, and maintenance of code for Accent Technologies' award winning commercial software products. The selected candidate will work with other experienced software engineers to ensure the quality of the software products by designing and writing code according to specifications highlighted in the design and planning phase, writing and running appropriate diagnostic tests, and proactively solving bugs as problems arise. The selected candidate will also have the opportunity to interact and assist customers and other employees with solution and technical related issues.

- Planning, designing, implementing, and modifying the software solutions
- Working as part of the team in development, testing, debugging and maintenance of solution
- Working in an extremely fast paced environment to solve problems and meet aggressive deadlines
- Research current industry trends, and assist with development and promotion of coding best practices within team and industry
- Designing and developing in Java, Java Swing Interface, C++ or C#, OOP, JDBC, SQL, and XML
- Experience in database connectivity, network architecture, distributed systems, Apache Tomcat, and MS Office applications
- Interacting with and assisting customers and employees at Accent Technologies on software product related issues

Qualifications:

Here's what you should bring to the table:

Education and Experience: BS/MS degree in Software Engineering or related field (with 3+ years of object-oriented programming and architecture skills, including GUI development).

Abilities: Ability to visualize and communicate the solutions effectively. This includes the ability to evaluate priorities appropriately, identify problems, and solve problems creatively and efficiently.

Skills: Strong expertise with Java, Java Swing Interface, C++ or C#, OOP, JDBC, SQL, and XML in Windows development environment utilizing all MS development tools.

Other Characteristics: Conscientious, flexible, highly motivated, professional with a team-oriented attitude that is willing to work individually and collectively with other team members.
