Accent Technologies is a small, fast growing software company focused on the high-growth digital asset management market. Our market leading Librarian, a business process management solution is used by many top Fortune 500 companies including several of the world's top financial, healthcare and sales and marketing firms.

Accent Technologies seeks a highly motivated, conscientious, and exceptional software engineer who loves to work in a dynamic, fast-paced environment using the latest technologies for software development.

Primary responsibilities are the design, development, and maintenance of code for Accent Technologies' award winning commercial software products. The selected candidate will work with other experienced software engineers to ensure the quality of the software products by designing and writing code according to specifications highlighted in the design and planning phase, writing and running appropriate diagnostic tests, and proactively solving bugs as problems arise. The selected candidate will also have the opportunity to interact and assist customers and other employees with solution and technical related issues.

Task Include

- Planning, designing, implementing, and modifying the software solutions.
- Working as part of the software development team to solve problems and meet deadlines.
- Designing and developing in ASP, HTML, DHTML, XML, Javascript, JSP, SQL, .Net framework and/or COM solutions in a Windows development environment. Agile development experience helpful.
- Interacting with and assisting customers and employees at Accent Technologies on software product related issues.
- Providing customers with installation and end user support.

Qualifications:

Here's what you should bring to the table:

- **Education and Experience:** BS degree in Software Engineering (or related field—preferably with 3+ years of object-oriented programming and design skills, including GUI development).
- **Abilities:** Ability to design, communicate, and implement solutions effectively. This includes the ability to evaluate priorities appropriately, identify problems, and solve problems creatively and efficiently. Familiarity with design patterns helpful.

The information contained in this document is confidential and the property of Accent Technologies, Inc. Any release of this information to anyone other than the direct employees of the company identified above must be approved in writing by Accent Technologies, Inc.

- **Skills:** IDEs such as Eclipse, NetBeans, or Visual Studio. Tools such as Ant, JUnit, SQL Enterprise Manager and InstallShield. Servers such as IIS, Apache, Tomcat, JBoss, Oracle and SQLserver. UML modeling in Visio helpful.
- **Other Characteristics:** Conscientious, flexible, highly motivated, and results-oriented professional. Must be able to work individually and as part of a small agile team.

What We Offer

Accent Technologies is an EEO Employer.

Accent Technologies offers a competitive compensation package. In addition, we offer a challenging and highly productive work environment that provides significant opportunity for personal growth and advancement. If you're looking for a dynamic and innovative environment, join us at Accent Technologies. We have a great team and offer the chance to help drive a market leading software company to the next level.
